Publisher: Kluwer Academic Publishers
Full text available: 🗎 pdf(149.41 KB)   Additional Information: full citation, abstract, references, index terms

   LMDS/LMCS is a broadband wireless local loop, millimeter‐wave alternative to
   emerging integrated multiservice access networks. Significantly large amounts of
   bandwidth − in the order of one GHz of spectrum − are made available to residential
   subscribers or supported business users respectively that employ highly directional
   antennas and signal polarization to establish communication with a central hub. Besides
   the requirement for dynamic bandwidth allocation capabilities, t ...

24 Endpoint admission control: architectural issues and performance
Lee Breslau, Edward W. Knightly, Scott Shenker, Ion Stoica, Hui Zhang
August 2000 **ACM SIGCOMM Computer Communication Review , Proceedings of the conference on Applications, Technologies, Architectures, and Protocols**
